DRESSER Wayne

# Dispenser Secure Access and Bezel Locking Kit

## Help Prevent Forecourt Theft

Dresser Wayne is leveraging its experience as a leader in security technology to help retailers fight the increasing risk of theft on the forecourt. The Dresser Wayne Dispenser Secure Access and Bezel Locking Kit help keep fuel inventories and customer financial data safe by offering protection against unauthorized access to the fuel dispenser's internal components. These security options can be used together or separately to deter thieves from opening dispenser doors. The Bezel Locking Kit provides the first layer of defense by discouraging bezel entry, and Dispenser Secure Access triggers alerts and shuts down the dispenser in the event of a bezel or hydraulic door breach.

# Dispenser Secure Access and Bezel Locking Kit

## Bezel Locking Kit

Designed by Dresser Wayne to be compatible with existing equipment, Bezel Locking Kits utilize industry-proven heavy duty, secure locks to provide an extra measure of protection to help keep thieves from opening dispenser bezel doors. The kits are available in six standard key-lock combination choices, or fuel retailers can request their own customized key and lock set.

## Dispenser Secure Access

Dresser Wayne Dispenser Secure Access detects unauthorized access to the internal components, triggering an alarm and shutting the dispenser down. Store personnel are notified when a "stopped condition" is displayed on the point-of-sale system. A unique passcode is provided for re-initialization and routine servicing. Choose between two security levels.

**Dispenser Secure Access Local Alert**

Dispenser Secure Access Local Alert discourages dispenser access through a series of site-specific responses to security breaches.

- Sounds audible alarm if unauthorized entry is attempted
- Disables fueling and takes dispenser offline to point-of-sale system
- Disables transmission of card data to protect against identity theft
- Notifies the attendant by sending an offline status message to the point-of-sale system
- Requires a passcode, entered via the dispenser's handheld remote control, to reactivate the dispenser

The Bezel Locking Kit and Dispenser Secure Access are available for installation on Ovation® and Vista fuel dispensers by certified Dresser Wayne technicians.

**Dispenser Secure Access Local Alert plus iSense™**

Dispenser Secure Access Local Alert plus iSense offers the added protection of Dresser Wayne iSense Premium Help Desk, providing real-time remote monitoring and alert capabilities. In addition to the local alarm and immediate dispenser deactivation offered with Dispenser Secure Access Local Alert, this security level sends alerts to offsite management or personnel. It also sends alerts to the Dresser Wayne Help Desk where authorized technicians can remotely monitor activity and reset the dispenser when the threat has ended. This advanced security package also includes automatic reporting capabilities. The time and date is captured each time the dispenser door is opened.

Key advantages of Local Alert plus iSense are:

- iSense remote monitoring connection
- Single-use password required for entry
- Alerts sent to selected personnel and/or management via e-mail or cell phone
- Remote reactivation
- Automatic reporting

Dresser Wayne leverages its security leadership to help protect retailers' fuel inventories and valuable customer financial data. Other security offerings from Dresser Wayne include the PCI-compliant iX™ Pay Secure Payment terminal. Designed to evolve as security standards develop, the terminal encrypts information at the dispenser keypad.
